EXPERIENCE

Staff Domain | IT Operation

January 2026 - June 2026

- **Data Migration and Validation:** Spearheaded the technical transition of tracking logs from legacy Excel frameworks into a centralized database system, significantly improving data transparency, sanitization, and structured validation.
- **Process Automation and Systems QA:** Leveraged PowerShell and Command Prompt scripting to automate data routines while conducting functional QA testing and issue tracking for an IT Management System managing over 5,000 assets.

PROJECT

Capstone Project | Four-in-One Vital Sign Sensor Kiosk with AI & IoT

June 2025 - May 2026

- **Database & AI Deployment:** Designed and optimized the backend relational database architecture to securely store and process real-time telemetry data streams from 4 embedded sensors, ensuring minimal data latency during peak application usage.
- **Data Science / Modeling:** Integrated, trained, and deployed predictive AI algorithms specialized in medical anomaly detection and complex health risk data analysis.
- **Data Flow Architecture:** Authored end-to-end software flowcharts and data pipeline architectures to ensure flawless data communication between hardware edge nodes and the centralized web application interface.

TECHNICAL SKILLS

- **Data Engineering & Architecture:** Relational Database Design, Schema Architecture, ETL/ELT Pipeline Optimization, Data Migration & Validation, Data Warehousing, Data Integration
- **Data Analytics:** Statistical Data Analysis, Predictive Modeling, Exploratory Data Analysis (EDA), Data Cleansing, Data Transformation, Reporting Dashboards (Power BI, Tableau), Microsoft Excel (Advanced, PivotTables, VBA, Power Query), Google Sheets
- **Data Automation:** Python, Excel VBA, Google Apps Script
- **Languages & Scripting:** PostgreSQL, SQL, Python, Java, C#, Node.js, JavaScript, HTML, CSS
- **Databases & Tools:** MySQL Workbench, Git/GitHub, REST APIs, Bash, Vercel, Supabase, Snowflake, IBM Watson Studio, Microsoft 365, Zoho, Google Cloud, Azure, Linux, Docker, YOLO, OpenCV, DBEaver

CERTIFICATIONS

Data Camp | Associate Data Engineer and Associate Data Engineer in SQL

- **Database Architecture & Warehousing:** Mastered relational database design, data warehousing concepts, and cloud-based systems using Snowflake SQL and PostgreSQL to engineer scalable data infrastructures.
- **Advanced Querying & Analytics:** Gained deep proficiency in multi-table joins, intermediate transformations, and visualization pipelines, validated through a data management theory assessment and capstone projects on student mental health and London transit networks.

Data Camp | Associate Data Analyst and Associate Data Analyst in SQL

- **Advanced Querying and Analytical Foundations:** Developed strong proficiency in multi-table joins, data aggregation, and complex relational filtering, applied directly through hands-on capstone analysis on student mental health datasets.
- **Data Manipulation and Modern Frameworks:** Actively mastering advanced PostgreSQL techniques including subqueries, window functions, and conditional CASE logic to clean, profile, and transform raw data into analytics-ready datasets.

IBM SkillBuild | Data Fundamentals

- **Data Lifecycle & Frameworks:** Mastered foundational data science methodologies, core analytics concepts, and enterprise data governance trends shaping the modern global data landscape.
- **IBM Watson Studio Proficiency:** Gained hands-on experience utilizing IBM Watson Studio tools and languages to efficiently clean, refine, and transform raw datasets into structured visual dashboards.

Cisco | Python Essential 1

- **Core Logic & Flow Control:** Mastered fundamental Python programming mechanics, including data types, variables, input/output operations, and complex conditional execution using loops and Boolean logic.
- **Data Manipulation & Automation:** Developed proficiency in utilizing advanced data structures like lists, tuples, and dictionaries alongside functional programming and exception handling to automate data routines.

EDUCATION

Bachelor of Science in Computer Engineering

July 2026

- Rizal Technological University
