WORK EXPERIENCE

STAFF DOMAIN PH - IT ADMIN INTERN

JANUARY 2026 – JUNE 2026

IT Support & Network Operations

- Diagnosed and resolved hardware, software, and network disruptions for internal employees, maintaining a high first-contact resolution rate.
- Performed system diagnostics, connectivity checks (e.g., ping tests), and basic network troubleshooting.
- Assisted in VPN setup and troubleshooting to ensure secure remote access.
- Applied knowledge of network configuration, including IP settings and domain connectivity.
- Leveraged Command Prompt and PowerShell to script automation tasks, accelerating system configuration and remote diagnostics.

IT Management System (ITMS)

- Conducted QA testing and issue tracking for the IT Management System (ITMS), working closely with DevOps to identify bugs, validate fixes, and improve overall system reliability.
- Supported the transition from manual Excel-based tracking to a centralized ITMS, significantly improving data accuracy, process visibility, and workflow efficiency.
- Helped enable management of 5,000+ IT assets through synchronized inventory tracking, contributing to approximately 80% faster onboarding processes.

Workstation Deployment & Onboarding

- Streamlined end-to-end employee onboarding by provisioning, configuring, and deploying hardware workstations to ensure day-one readiness.
- Installed and configured operating systems, software applications, and company-required tools.
- Joined devices to domain environments and ensured proper user access and permissions.
- Coordinated with employees to ensure smooth onboarding and readiness of IT resources on Day one.

PROJECTS

Four-in-One Vital Sign Sensor with BMI Calculation using AI and IoT for Health Risk Prediction

CAPSTONE / 2025 - 2026

- Engineered an AI-driven health analysis system, designed the database architecture for collected data, and created intuitive UI/UX layouts."
- Engineered an AI-driven health analysis system, designed the database architecture for collected data, and created the UI/UX layouts.
- Modeled, trained, and deployed AI algorithms specialized in medical anomaly detection and data analysis.
- Integrated hardware sensors with the software interface, executing precise sensor calibration, testing, and wire management.
- Authored system flowcharts, mapped out the software and network architectures, and designed the physical 3D layout of the kiosk.

SKILLS

TECHNICAL SKILLS

- **IT Support & Administration:** Troubleshooting, ticketing systems, Active Directory, Datto RMM, IT asset management, QA testing, issue tracking
- **Networking:** TCP/IP (OSI model), TCP/UDP, DHCP, ARP, ICMP, basic network diagnostics and troubleshooting
- **Programming Languages:** HTML, CSS, JS, Python, C#, Java

CORE COMPETENCIES

- **Systems & Network Administration:** Active Directory, Azure AD, VPN Setup, Domain Connectivity, DNS/IP Settings, Windows/Linux/macOS
- **IT Tools & Platforms:** Datto RMM, Snipe-IT (ITMS), Command Prompt, PowerShell, Git/GitHub, Jira/DevOps Tools
- **Core Competencies:** Technical Support & Troubleshooting, Workstation Deployment, Cross-functional Collaboration, Asset Lifecycle Management, QA Testing

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER ENGINEERING

EXPECTED JULY 2026

- Rizal Technological University
