Pasig City

SKILLS

TECHNICAL SKILLS

- **Frontend Development:** HTML5, CSS3, JavaScript (ES6+), React.js, Responsive UI/UX Design, Cross-Browser Compatibility
- **Backend & Databases:** Python, Java, C#, Node.js, SQL, Relational Database Architecture & Schema Design
- **Tools & Platforms:** Git, GitHub, PowerShell/Bash Scripting, Jira, Command Prompt

CORE COMPETENCIES

- Full-Stack Web Development, Object-Oriented Programming (OOP), Functional QA Testing & Bug Tracking, Automated Scripting, Data Migration & Validation, Cross-Functional Team Collaboration

PROJECTS

Four-in-One Vital Sign Sensor Kiosk with AI & IoT (Thesis) | 2025 – 2026

- **Full-Stack Architecture:** Engineered a web-based user interface and robust backend system to streamline user registration, real-time data authentication, and health analysis.
- **Database & AI Deployment:** Designed and optimized the database architecture to securely store high-volume telemetry data; integrated and trained medical anomaly detection algorithms.
- **System Mapping:** Authored end-to-end software flowcharts and network architecture diagrams to ensure reliable communication between hardware nodes and the web application interface.

Personal Portfolio Website | 2025 - 2026

- **Responsive Frontend:** Designed and deployed a modern, responsive personal portfolio website using clean semantic HTML, CSS, and modern JavaScript to showcase technical projects.
- **Performance Optimization:** Optimized asset loading, hosting configurations, and cross-browser compatibility to ensure lightning-fast page speeds and seamless user experiences.

Restaurant Dashboard System | 2024

- **Data-Driven UI:** Developed an interactive full-stack management dashboard allowing restaurant operators to track orders, manage menus, and view real-time business performance analytics.
- **State & Data Management:** Implemented structured relational database schemas to efficiently handle transactional order states, inventory tracking, and concurrent user queries.

Computers and Parts E-Shop System | 2023

- **E-Commerce Logic:** Built an e-commerce web application featuring robust catalog search filtering, a dynamic shopping cart system, and secure checkout simulation workflows.
- **Backend Security:** Enforced secure object-oriented programming principles to manage user data, inventory updates, and session states safely.

WORK EXPERIENCE

STAFF DOMAIN PH – IT Operations & QA Intern | January 2026 – June 2026

- **QA & Bug Tracking:** Conducted rigorous functional QA testing and issue tracking for a centralized IT Management System (ITMS), collaborating directly with core DevOps teams to validate system stability.
- **Process Automation:** Leveraged PowerShell and Command Prompt scripting to build automated routines, accelerating environment configurations and remote diagnostics.
- **Data Migration:** Spearheaded the technical transition of company tracking logs from legacy Excel frameworks into a centralized database system, vastly improving data transparency and validation.

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER ENGINEERING

- Rizal Technological University

EXPECTED JULY 2026
